

The image shows a grayscale micrograph of a material surface, likely a metal, with a series of parallel, slightly curved ridges or grooves running diagonally from the top right towards the bottom left. The surface has a fine, granular texture. In the lower right quadrant, there is a scale bar consisting of a solid red line with arrows at both ends. Below the solid line are two red 'x' marks, each connected to the solid line by a vertical dashed cyan line. A white rectangular label is positioned at the right end of the scale bar.
